RE: Docket No. 99D-0557

Dear Sir/Madam:

I am against any xenotransplant research. It would seem that there are safer, more humane alternatives to xenotransplantation.

It concerns me that we are running a high risk of inter-species virus transmission if this research were to continue. A more sensible approach would be to aggressively promote preventive medicine and to increase human organ donation rates.

I hope that you will take my concerns under consideration.

Sincerely,

Alana F. Turman
